<b>EMERGENCY RECONNECTION OF ELECTRIC SERVICE</b>	
In the event of disruption in electrical service to a premise due to storm damage, damage by falling tree, service pulling free from structure, truck damage, etc. in which Oncor is required to reconnect such service to the premise, a release for reconnection by the city of Dallas building inspection department is required.	
The customer is required to obtain an electrical permit by hiring an electrical contractor that is registered with the City of Dallas. Once repairs are made, the electrical contractor will call for an inspection, at which time a release for reconnection of electrical service will be issued to Oncor.	
An exception to this requirement would be in the event the premise is disconnected due to non-payment, in which case Oncor may reconnect electrical service at its discretion.	
An inspection is required anytime an electrician works on the meter or wiring, which includes; lugs, breakers, wires, etc.	
If an Oncor technician replaces the lugs, an inspection is not required.	

***Many cities, towns and counties in our service area require an inspection be completed prior to Oncor performing the requested service. Inspection requirements can change at any time and vary by city, town or county. Please check with local authorities where the service is being requested for the most current requirement(s).***
