

# Oncor Small Cell Meter Exception Request

Rev. 4-13-2022

Due to site conditions, limited space or government regulations, the Licensee is requesting an exception to Oncor's ground mounted equipment policy. The review will only determine if the meter is allowed on the identified pole and will not address related topics such as the availability, location or means of access to an appropriate power source. Those topics will be addressed with you during the Permit Application (PA) process as implemented by the PA Process Contractor, Small Cell Team and Joint Use Team.
