Electric Demand Reset Verification

Oncor Electric Delivery Company LLC (Oncor) will consider establishing a new demand for the purpose of resetting the electric demand ratchet for an existing premise when the customer has a verifiable permanent reduction in diversified load resulting in at least a 50% reduction from the peak billing demand. Permanent electrical load reductions require the removal of equipment from the facility.

reductions require the removal of equipment from the fac	illity.

	al load at this premise has been reduced by at least 50%, as verified by the above load study. Any adjustment to
	s and is not retroactive. However, if the electric demand ratchet is reset and the measured electric demand at this
premise subsequently reaches 75% or higher of the previous peak actual demand within the next 6 months, Oncor will reinstate the prior electric demand rathet and	
rebill prior periods. This would demonstrate that permanent electrical load reductions were not made at this premise. Permanent electrical load reductions will be made	
by removal of equipment from the facility.	·
