Commercial High Efficiency Foodservice (CHEF) Program

RELISH THE PROFITS FROM ENERGY EFFICIENCY

Restaurant kitchens are some of the largest energy consumers in commercial real estate. According to the Environmental Protection Agency (EPA), commercial kitchens consume almost 2 to 5 times more energy than other types of commercial buildings. Investing and upgrading to more energy efficient technologies can increase energy savings and enhance your bottom-line.

OPPORTUNITIES TO SAVE

Oncor offers energy efficiency programs designed to help commercial foodservice facilities save energy, which can improve operations and drive higher profit margins. Oncor will pay incentives for qualifying energy saving equipment. Partner with us and help make energy efficiency a win-win for you and your customers.

GET STARTED

* Eligible units must be compliant with current ENERGY STAR® specifications

† Incentives vary based on temperature and sanitation methods

Products and services are provided solely by approved participating Service Providers. Oncor does not sell goods or services in its energy efficiency programs. Eligible customers must be served by Oncor and located in the Oncor service area. Take A Load Off, Texas® is provided by Oncor Electric Delivery Company LLC (Oncor) as part of its commitment to reduce energy consumption and demand. TRC Companies implements the CHEF Program as an independent contractor. For more information, visit <u>www.oncor.com/takealoadofftexas</u>.
